## DETAILED ACTION

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 41-43 have been rejected under 35 U.S.C. 102(b) as being anticipated by Henry, 486227.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30 and 44 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Henry, 486227 in view of Wedler, 5008989. Henry discloses a single biasing member (coil spring H) for biasing the pawls and in turn biasing the release button in a first position via the release members. The claims require two biasing members: one for the pawls and one for the release button. Wedler discloses the use of two biasing members: one (55) for pawls and one (58) for the release button. It would have been obvious to add a second biasing member for Henry's release button to ensure that the release button returns to the first position once the user's finger force is removed from the button.

***Allowable Subject Matter***

Claims 3-5 and 31-40 have been allowed. Claims 31-40 have been allowed because the prior art fails to disclose a release button with a first recess spaced apart from a second recess, wherein the first recess receives the first release member and the second recess receives the second release member.

Claim 45 has been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
